

PIMMS Error Listing

The PIMMS error report is sent nightly to alert you to any errors returned by the PIMMS sync. These errors prevent any changes to the record from syncing, so they must be addressed to allow the patron or machine information to be updated. Errors remain in the report until they are corrected and the patron can successfully sync with PIMMS.

If an error is not listed below, or if the included recommended action / things-to-check do not clear the error, please contact Customer Support with the full row information from the report, including the Patron or Machine ID and the full error text.

Note that one line may include multiple errors. For example: "MaintainPatron - Edit Failed
First name must be a minimum of 1 and a maximum of 255 characters
Last name must be a minimum of 1 and a maximum of 255 characters
Individual patrons must have a 4 digit birth year (YYYY), or a full birth date (YYYY-MM-DD)"
